Hapbee a digital wellness platform that promotes improved sleep, focus, and relaxation.

Hapbee Smart Wearable Sleep Device

**The Next Generation of
Wearable Wellness Technology**

Use Hapbee's **patented technology** to bio-stream compounds like caffeine & melatonin digitally - without you having to ingest them. No lingering side effects, no stomach discomfort.

Hapbee's technology is **proven safe and effective** with years of clinical and consumer data. Hapbee is being used by US active and retired military, professional athletes and wellness practitioners who want to sleep and focus better without taking drugs or supplements.

Hapbees' **tiny magnetic songs naturally stimulate bio-receptors** in cells to recreate the same sensations without the side effects. **Fall asleep faster and stay asleep.** Get the rest you need to feel better, maintain focus during the day and increase performance. Simply choose the blend you'd like to play, and Hapbee does the rest.

Over 25 blends are available to **help imitate the natural magnetic effects** of substances that people use every day to sleep, enhance their mood, get work done and relax. The best part is that as soon after you turn Hapbee off, your body simply stops feeling the blend. **No lingering side effects.** Nothing left in your body to metabolize or eliminate.

Engineered for Deep Sleep. Built for You.

A completed redesigned form-factor designed exclusively for sleep. 50% more powerful, 5+ night battery-life. Make your sleep data actionable.

Hapbee's bio-streaming technology (ulRFE®) emulates specific magnetic field to produce desired feelings in the body.

Now, with the Smart Sleep Pad We've engineered it to solve your most important challenge: Getting Better Sleep

Crafted For Your Maximum Comfort

Slim 1/2 inch thick, 100% Cotton Outer. And rest easy with anti-microbial, non-allergenic & flame-retardant finish.

Hit the Power Button, Hit your favorite routine, then hit the hay.
